

WILDLIFE GENETICS™

SOW WITH US,
HARVEST THE WILD!

BUCKWHEAT

Buckwheat (*Fagopyrum esculentum*) is a warm-season annual forage that can provide several benefits to your Whitetail food plot program. However, it is not a legume, as are some of the more commonly planted summer deer forages, such as soybeans, cowpeas, lablab, and alyceclover.

- Great soil building resource
- Frees up nutrient in soil for the next crop

SEEDING RATE:

Sow 40-50 lbs. per acre

HALL, NY (585) 526-6391

MIFFLINBURG, PA (570) 966-3841
