HARVEST THE WILD!

CRUSADE WHITE CLOVER

Improved winter regrowth, extended grazing potential during colder months. A stand of white clover is also a great early-season bow spot, but it doesn't just attract Whitetails in the fall. Hen turkeys eat it in the spring, and they'll nest around a clover plot, too. Rabbits devour it, quail chase bugs in it, and even bears will eat it. Available in 25 and 50 lb. bags.

SEEDING RATE:

Sow 5lbs. per acre

HALL, NY (585) 526-6391
