HARVEST THE WILD!

RECOIL CLOVER MIX

Selected for the backwoods of the Northeast. Versatile mix that produces improved yields and palatability with stand longevity. When properly managed, clover can produce as long as 3-5 years.

- Ideal fit for small isolated food plots or open field seeding
- Works well across multiple soil types
- Can be seeded both spring and fall
- Can be frost seeded
- First feed for deer to hit in the spring
- Draws and holds deer throughout the hunting season in all geographies

KEY COMPONENTS:

- A pure perennial mix
- Contains improved varieties for longer stand life
- Produces palatability with stand longevity

FORMULA:

Stamina White Clover, Wildcat Red Clover,
Alfalfa, Chicory

SEEDING RATE:

Sow 10 pounds per acre
