

WILDLIFE GENETICS™

SOW WITH US,
HARVEST THE WILD!

SUGAR BEETS (Coated)

Sugar beets provide a crucial energy source, particularly during the colder months when other food sources become scarce. They are packed with carbohydrates and offer a palatable treat that keeps wildlife returning. Compared to other root crops, sugar beets stand up well to harsh weather, making them a reliable food source throughout the hunting season. Available in 3, 5, and 20 lb. bags.

SEEDING RATE:

- Sow 8-10 lbs. per acre

HALL, NY (585) 526-6391
