

WILDLIFE GENETICS™

SOW WITH US,
HARVEST THE WILD!

SURVIVOR WINTER PEAS

Winter peas, specifically Survivor are a popular choice for food plots because they offer several advantages. They are relatively easy to establish, even in less-than-ideal soil conditions. Survivor Winter Peas are moisture efficient, cold tolerant cover crop with weed suppression, and nitrogen fixation. They also grow quickly, providing a readily available food source for wildlife.

- Great for winter blends

KEY COMPONENTS:

Sow 50-70 lbs. per acre

HALL, NY (585) 526-6391

MIFFLINBURG, PA (570) 966-3841
