

WILDLIFE GENETICS™

SOW WITH US,
HARVEST THE WILD!

THOR TRITICALE

This cross of cereal rye and durum wheat produces a high-protein, winter-hardy crop for forage or grain production.

Multi-tillered plants produce rapid early-season growth enabling them to fill in and cover the ground quickly for superior weed suppression. Its aggressive root system builds biomass while scavenging nitrogen.

- Can be planted both spring and fall

SEEDING RATE:

Sow 100-120 lbs. per acre

HALL, NY (585) 526-6391

MIFFLINBURG, PA (570) 966-3841
